Brand introduction

Sustainable Finance is a new joint venture between Quadrent and Purpose Capital, created to fund projects that deliver measurable social or environmental impact. Its focus is on decarbonising New Zealand's energy sector through accessible, scalable sustainable leasing.

Strategic Importance

With the withdrawal of traditional government support mechanisms (e.g., GDI, NZGIF), there's a critical funding gap for large-scale sustainability initiatives. Sustainable Finance steps in with structured financing that aligns to long-term asset life cycles and ROI models.

Note

These guidelines have been developed to support you and your team's Sustainable Finance work. Please contact us with any questions you may have about these guidelines or their application.

For any queries please contact:

Simon Dennis – Quadrent Marketing Manager

Our brand story

Sustainable Finance is more than a joint venture – it's a commitment. Born from the shared purpose of Quadrent and Purpose Capital, this partnership exists to unlock the full potential of decarbonisation in Aotearoa New Zealand. Together, we are shaping a new financial pathway – one that supports large-scale, long-term energy transformation while generating measurable value for our people, planet, and economy.

In a world where environmental impact and financial return are too often at odds, Sustainable Finance bridges the gap. Our leasing solutions are purpose-built to enable capital-intensive, socially and environmentally positive projects to move forward – faster, smarter, and with long-term vision.

At the heart of our identity is the adapted Purpose Capital icon – a symbol of impact with intent. Brought to life with the Quadrent colour palette, representing our four core values.

Our brand is clean and confident – a reflection of the clarity we bring to complex financial projects. Every design element serves a purpose: to support communications, signal integrity, and connect people to something bigger than finance – the future of Aotearoa.

Sustainable Finance isn't just a funding partner. We're a force for good, designed to help visionary organisations take the next step toward a decarbonised, resilient New Zealand. One that works – for today, and tomorrow.

Vision, mission and values

Vision

A greener future for Aotearoa is good for all.

An economy no longer reliant on dissipating fossil fuels is critical to ongoing productivity and future affordability for households and businesses.

Investing in the decarbonisation of Aotearoa's infrastructure now will lead to prosperity and security for future generations of New Zealanders.

Our mission

To help accelerate decarbonisation and renewable energy development opportunities by providing efficient and scalable debt financing solutions.

Our core values

Our values drive our decision-making every day. They are the cornerstone of the Sustainable Finance mission and dictate how we show up to work for our clients, colleagues, and selves.

Knowledge and Insights	Strong customer relationships drive continuous, meaningful impact. To develop these relationships, there must be strong understanding between business and customer. We see it as our business to know how to help our customers drive positive change in New Zealand better than anyone else, and we use our experience to your advantage.
Personality and Community Contribution	Business is personal, and creating a safe, sustainable future for Aotearoa affects all of us beyond our commitments at work. It's people that make the difference. Our people are knowledgeable and committed to positive environmental and social outcomes, approachable with any queries, and make it their business to help you succeed.
Quality and Trust	Quality is the result achieved by combining market-ready solutions and structures with personality, commitment, and knowledge. Our people are passionate about providing quality outcomes because that's what drives real change in the long term.
Commitment to Sustainability	Knowing what's right and walking the talk are very different things. Our commitment to "doing what we say we will" consistently has created a name that can be trusted. We're passionate about a future that's healthy and safe for all New Zealanders, and it starts with our own actions at work and at home.

Our logo

Our logo is the first point of identification for our brand.

The central stems, Personality and Community Contribution and Quality & Trust, are central to servicing the needs of our clients to deliver great outcomes through their projects.

By providing our clients with the depth and breadth of our team's Knowledge and Insights, and our passionate Commitment to Sustainability, the outer stems of our values, we know that we can deliver outstanding, impactful, insightful financing solutions to clients driving important, future-focused projects that will resonate with all New Zealanders.

Our primary logo should always be used. If due to space constraints the horizontal primary logo can not be used, there is a secondary portrait option available.

The logomark shouldn't be used by itself (unless specified by Marketing).

Primary Logo

Secondary Logo

Logo colour

Our logo should always be displayed in colour.

If for any reason you cannot use the coloured logo, use the single-colour logo in white.

Full colour – Use exclusively on light backgrounds.

White version – Use on dark backgrounds.

Using the logo over imagery – To use our logo effectively, place it over a clear area of the photo, not over busy textures, or people. Use the colour version of our logo on light backgrounds and the white logo on dark backgrounds.

Logo colours

	Knowledge Grey
	Personality Orange
	Trust Blue
	Sustainability Green

See page 11 for colour breakdowns

Logo size

Minimum size – All versions of the Sustainable finance logo may be scaled proportionately to any size. To maintain legibility, minimum size restrictions apply.

To maintain consistency across different formats, the size of the logo should be:

Primary Logo:

Print – no smaller than 12mm high

Digital – no smaller than 60px high

Secondary Logo:

Print – no smaller than 20mm high

Digital – no smaller than 100px high

File formats

The logo is available in a variety of file formats, optimised for a specific use. Using the correct file format will ensure the designs come out with the best possible result.

Print – Use .EPS

These file formats can be scaled up or down without losing quality, and reproduce better in print.

Digital – Use .JPEG, .PNG, .SVG

These file formats are the best to use online or where the output will be displayed on screen. SVG files have the advantage of being scalable without pixellation and should be used for websites and apps to keep the logo sharp.

Clear space

When using the Sustainable finance logo, it is important to have clear space around it. This ensures the logo is unobstructed by other graphic elements.

Clear space – The clear space must be the width of the green leaf and stem from the logomark.

Our colours

Our colours bring our identity to life and reflect our core values.

The primary colours come from our logo palette: Sustainability Green and Trust Blue. These can also be used at 25% or 10% tint.

We also use Earth Green and other logo colours when needed, to complement imagery or as subtle accent tones.

Primary colours

SUSTAINABILITY GREEN

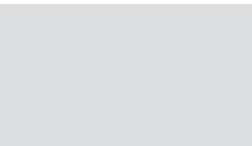

CMYK 71, 0, 100, 0
RGB 83, 170, 40
Hex #53AA28

TRUST BLUE

CMYK 100, 97, 24, 16
RGB 16, 42, 100
Hex #102A64

Secondary colours

KNOWLEDGE GREY

CMYK 0, 0, 0, 15
RGB 220, 221, 222
Hex #DBDCDE

PERSONALITY ORANGE

RGB 245, 160, 0
Hex #F5A000

EARTH GREEN

CMYK 84, 43, 89, 43
RGB 28, 79, 44
Hex #1C4F2C

OCEAN BLUE

CMYK 80, 66, 43, 35
RGB 53, 67, 85
Hex #354355

Typography

Our brand uses Source Sans Pro for all communications, this helps to tie all communications together, from digital and print copy.

Source Sans Pro is a modern, open-source sans-serif typeface designed for readability across both print and digital interfaces.

There are a few things to keep in mind to ensure consistency and clarity throughout the brand. Type should always:

- Be left aligned
- Have no hyphenation
- Have good contrast to the background
- Body text should be 90% black or higher.

If source sans Pro isn't available it can be substituted with the system font Calibri that is available on all computers.

Our brand elements

Our brand elements work together to express our identity and create engaging designs that reflect our vision and values.

Graphics

The logomark can be used in white at 20% opacity on covers and as a subtle design feature.

Can also be used in knowledge grey or sustainability green on white backgrounds.

NOTE: Graphic frames can have top left and bottom right rounded corners.

Colour blocks can be used as a design feature in footers.

The green bar should be the same width as the other three blocks combined.

Height can vary, but should generally remain thin.

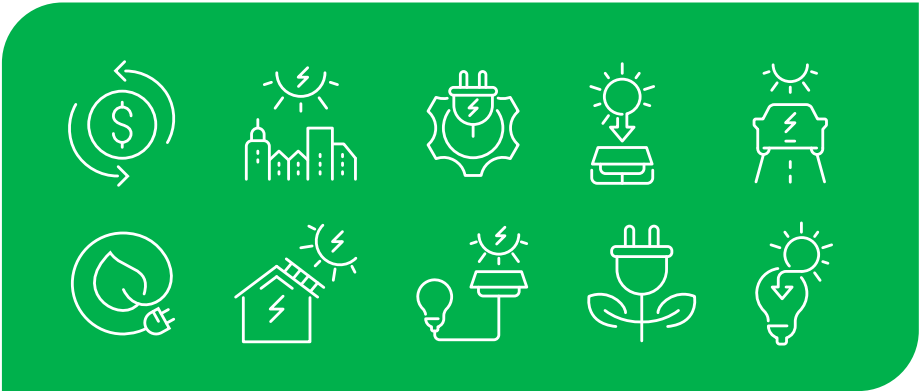

Icons

A few icons have been developed to support the Sustainable Finance brand. The icons are simple but engaging and are available as outlines for usability across different mediums.

To ensure legibility, the use of icons is limited to:

- full colour on white / light backgrounds
- white with accent on trust blue background
- all white on solid colour dark backgrounds

Other business icons are available on request.

Imagery

At Sustainable Finance, our work is rooted in growth, progress, and creating a greener future for New Zealand.

Our imagery reflects this purpose. We draw from the natural beauty of Aotearoa New Zealand – its landscapes, flora and fauna, infrastructure, and the people driving sustainable change. Every image we use should support our mission and connect viewers to the real impact of sustainability in action.

Image style

- High-quality, natural photography
- New Zealand centric where possible
- Real, relatable scenes of renewable energy, infrastructure, and community
- Clean, modern compositions with plenty of breathing space

We avoid

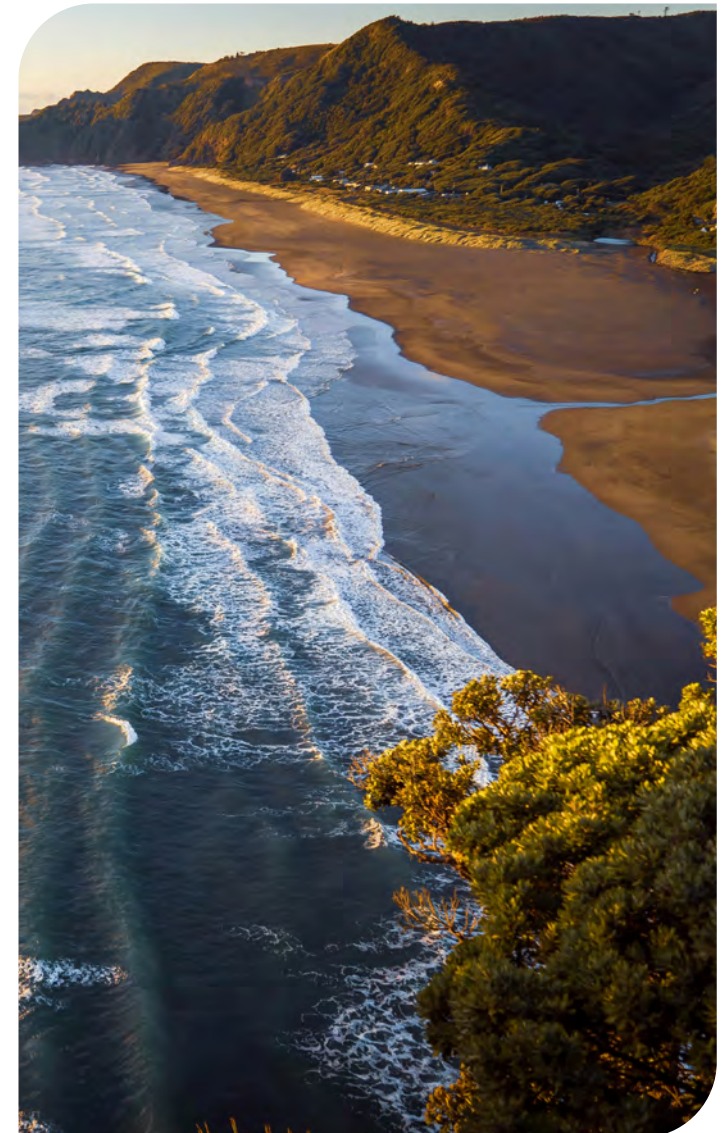

- AI-generated or heavily conceptual/abstract visuals
- Overly busy, cluttered imagery
- Overused stock clichés (e.g., generic “green” handshakes or seedlings)

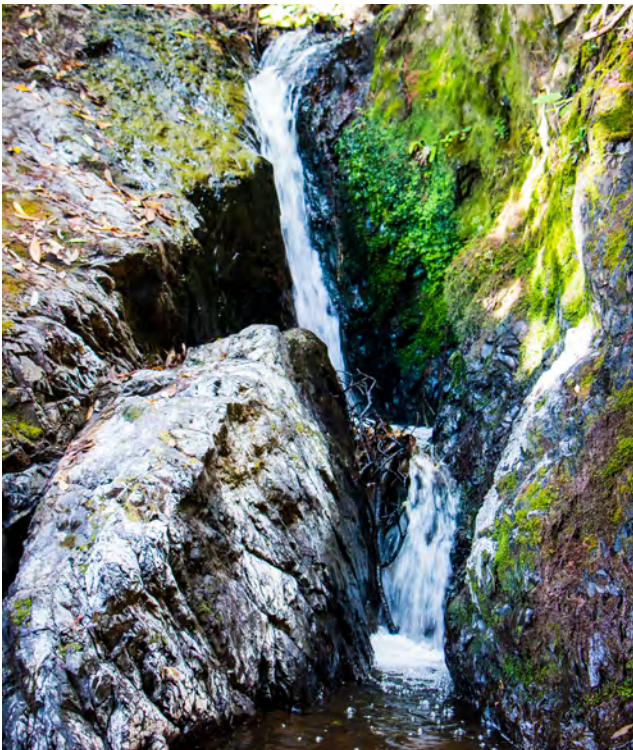

Overall tone

- Professional
- Optimistic
- Authentic – we show sustainability happening in the real world

Our photography should always inspire action, reflect our values, and help our audience picture a better, sustainable future for Aotearoa.

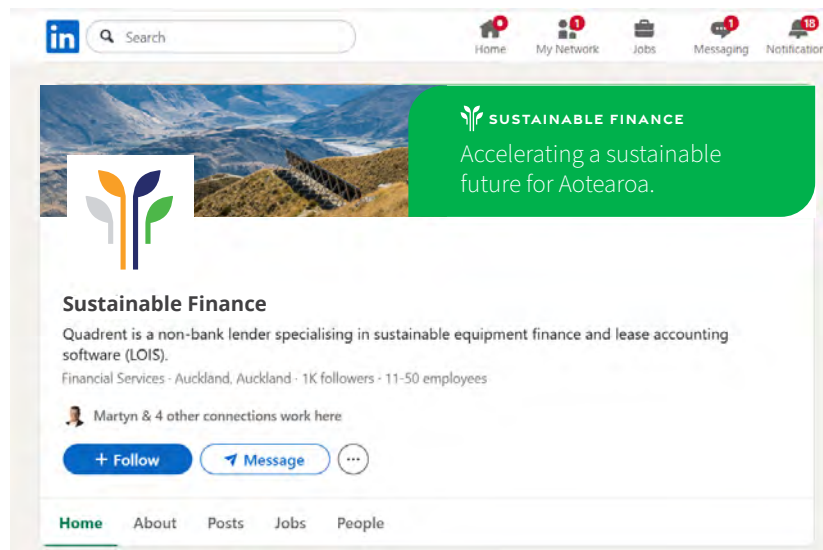

NOTE: Graphic frames and photos to have top left and bottom right rounded corners.
